Acme Robotics - Security Policy (2026)

Section 1. Passwords
All employee passwords must be at least 14 characters long.
Passwords must be rotated every 180 days and may not be reused.
Multi-factor authentication (MFA) is mandatory for VPN and email access.
Accounts are locked for 15 minutes after 5 failed login attempts.

Section 2. Incident response

Security incidents must be reported to security@acme.example within 1 hour of discovery.

The on-call security engineer triages incidents and opens a post-mortem within 5 business days.

Customer data breaches are escalated to the legal team immediately.

Lost or stolen laptops must be reported to the IT helpdesk on the same day.

Section 3. Devices and data
All laptops must use full-disk encryption and lock the screen after 5 minutes of inactivity.
Confidential data may only be stored on company-managed devices and approved cloud storage.
USB storage devices are blocked on company laptops unless an exception is approved by security.
Data is classified as Public, Internal, Confidential or Strictly Confidential.

Section 4. Backups and vendors
Production databases are backed up every 6 hours and backups are kept for 35 days.
Backup restore tests are performed every quarter.
Vendors receive time-limited access accounts that expire after 90 days.
Vendor access to production systems requires approval from the system owner.
